GraphQL

Managerial background

Enthusiastic Engineering Manager eager to contribute to team success through hard work, attention to detail and excellent organizational skills. Motivated to learn, grow and excel in Software Development. Managing a diverse team of individuals at Rakuten to build a highly available and resilient backend service that is used by millions of people in Japan everyday.

Work History

2021-10 -

Current

Engineering Team Manager

Rakuten, Tokyo

- Managed a team of 4 onsite and 4 offshore software engineers for building a scalable backend API service in Rakuten Ichiba.
- Established "One Gateway Service platform" in Rakuten using GraphQL and Restful schemes in Java for multiple frontend like Rakuten Ichiba, Rakuten Fashion, Rakuten product page etc.
- Manage projects, task priorities and product roadmap. Managing budget for platform and team.
- Design OKRs for the team and mentor engineers to grow in their careers.
- Connect with stakeholders in frontend and platform teams to meet shared objectives.
- Conducting interviews, hiring individuals and maintain pace of team.
- Led development on 2 simultaneous projects, multi-tasking across several deliverables while remaining in direct control of development paths.

2019-10 -

2020-10

Senior Software Engineer

Rakuten, Tokyo

- Worked with project managers, developers, quality assurance and customers to resolve technical issues.
- Trained and mentored junior developers , teaching skills in Reactive Programming, Springboot and GraphQL Java and working to improve overall team performance.
- Designed and Developed a new Backend for Frontend (BFF) framework for connecting micro-services and the frontend services of Rakuten E

2017-10 -
2019-11

Software Engineer

Rakuten, Tokyo

- Designed and Developed scalable, efficient GraphQL APIs for the E commerce platform of Rakuten Ichiba using SpringBoot, Java, Memcached, Docker and Spring Cloud services.
- Migrated E Commerce micro-services to use this new API platform that can handle high traffic of 20k-30k requests per second
- Designed an OAuth 2.0 Authentication system to ensure Security by implementing a Custom JWT format token.
- Coordinated efficient large-scale software deployments.

2016-06 -
2016-07

Research Intern

NTT Data, Tokyo

- Researched for designing language modules using NLP for the greeting robot at the reception of NTT Data
- Designed a Video conferencing solution to connect the various offices of NTT Data across the globe

Education

2013-06 -
2017-05

Bachelor of Engineering: Computer Engineering

Pune Institute of Computer Technology - Pune, India

College CGPA: 3.73/4.0

University Grade: Passed with "First Class with Distinction"

Honor :

"Best Thesis Project in Intelligent Systems April 2017"

- Award Host: Pune Institute of Computer Technology
- Achievement: Ranked 1st in my college's Annual project convention for final year thesis demonstrations.

Accomplishments

Speaker at Oracle Code One 2018 (San Francisco, United States)

- Gave a tech talk at the premier JAVA conference in the world explaining the use of GraphQL APIs in E commerce platform.

Certified Tech Trainer at Rakuten

- I train Software engineers and architects to integrate Prometheus Metrics system to monitor high scaled applications.
- I have been giving 2 sessions per Quarter for the last 2 years. Each session is attended by around 20-30 people.
